

 California ISO	Operating Procedure	Procedure No.	5330B
		Version No.	6.1
		Effective Date	12/11/23
Spinning and Non-Spinning Reserve Imports		Distribution Restriction: None	

In accordance with the CAISO Tariff, [name of SC], hereby attests its ability to deliver Spinning Reserve, and/or Non-Spinning Reserve services to the point(s) of Interchange (TNAME) with the CAISO Balancing Authority Area in the amounts (individually or in aggregate) equal to or less than the maximum scheduling capability, in each Trading Hour, indicated in the following table. With this request, the Scheduling Coordinator recognizes that the CAISO Tariff requires the Scheduling Coordinator to respond to CAISO Dispatch Instructions ordering the delivery of Energy from the self-provided or Bids of external imports of Spin and/or Non-Spin Ancillary Services either pre-dispatched or during the operating hour. The Scheduling Coordinator further attests that any and all Spin and/or Non-Spin Ancillary Services Bid or self-provided as external imports of System Resources will be delivered over non-interruptible, non-recallable transmission rights, from the source of the Ancillary Services to the point of Interchange with the CAISO Balancing Authority Area.
