Release Plan Summary

Independent 2025 Releases

- FERC Order 2023 Generator Interconnection Life Cycle Release 2.1 – January
- Highest Emergency Rating – February
- CPM Enhancements Track 1* – April
- Hybrid Resources Phase 2C: RIMS* – April
- Congestion Revenue Rights System Upgrade – April
- Transmission Exchange Agreement – May
- FERC 881 – Managing Transmission Line Ratings Track 2 – Operational/EMS Model Data & Applications* – July
- Enable Non-Generating Resources to Participate in Inter-SC Trade
- WEIM FAB Enhancements

Spring 2026 Release

- Day-Ahead Market Enhancements Activation* – May
- Extended Day-Ahead Market Activation* – May
- EDAM ISO BAA Participation Rules* – May
- EDAM Onboarding – May & October
- WEIM Onboarding – May

Future Release

- Transmission Service & Market Scheduling Priorities Track 4
- Subscriber Participating Transmission Owner Model*
- Settlement Upgrade Project – Next RUG/SUG quarterly update April 2025

**Policy*

New: BRS Stakeholder Comments & Review Sessions

- **Stakeholders can now submit comments on Business Requirements Specifications**

- BRS Comments open for:

Closed	Open	Upcoming
<ul style="list-style-type: none">• WEIM Enhancements v1.1 – thru 01/16/25• EDAM ISO BAA PR v1.2 – thru 10/9/24• TSMSP2 v1.1 – thru 10/16/24• EDAM v1.3 thru 10/31/24• DAME v1.3 thru 9/30/24• Subscriber PTO thru 8/15/24• FERC Order 2222 thru 8/9/24• EDAM ISO BAA Participation Rules v1.0-1.1 thru 8/2/24	<ul style="list-style-type: none">• EDAM ISO BAA PR v1.3 – thru 01/24/25• DAME v1.4 – thru 01/24/25	<ul style="list-style-type: none">• EDAM v1.4

EDAM ISO BAA PARTICIPATION RULES BRS 1.3

Spring 2026 – EDAM ISO BAA Participation Rules

Project Information	Details/Date
Policy Scope	<p>The purpose of this initiative was to define the unique aspects of how the ISO Balancing Authority Area (BAA) will participate in the Extended Day-Ahead Market (EDAM). The policy addressed how to settle Transfer Resources and Transfer Revenue, the criteria to set ISO BAA's net EDAM Export Transfer constraint, how to allocate ISO BAA resource sufficiency evaluation (RSE) failure surcharges and revenues, and the process for calculating historical revenue recovery amounts.</p> <p>Previously labeled EDAM ISO BAA participation Rules Track A1, or Track A. Going forward label to be simply <i>EDAM ISO BAA Participation Rules</i></p>
Tariff Changes	<p>FERC Filing ER24-379 – Sections 11, 26, and 27</p> <p>Approved Tariff Changes:</p> <ul style="list-style-type: none"> ➤ To allow for the settlement of all Transfer System Resources in the CAISO BA. ➤ To allow for the settlement of EDAM Transfer revenue allocated to the CAISO BA, inclusive of EDAM Transfer revenue and EIM Transfer revenue ➤ To allow the CAISO BA to enable the Net EDAM Export Transfer Constraint, a voluntary, and optional, mechanism that each EDAM Balancing Authority may enable to preserve sufficient supply to meet its projected needs, while managing reliability based on conditions and circumstances anticipated within its balancing area. ➤ To allow an interim solution for the CAISO to distribute all CAISO BA revenues and surcharges for the EDAM RSE Failure Surcharge. <p>Unapproved Tariff Changes (filed 11/14, pending FERC Order):</p> <ul style="list-style-type: none"> ➤ To set forth the calculations for the EDAM Historical Revenue Recovery amounts for transmission owners in the CAISO BA – referenced as “EDAM Access Charge for CAISO BAA”
High Level Project Scope	Based on current approved Tariff changes
Impacted Systems	Internal ISO Systems, Settlement configuration changes

External BRS v1.3: EDAM Access Charges for ISO BAA Tariff Filing Scope

Section	Summary of Additions/Changes
1.1, 2.1	Updates to reflect the 11/14/2024 Tariff Filing to implement the EDAM Access Charge framework in the CISO BAA.
3.1	<p>BPM references updated:</p> <ul style="list-style-type: none"> - Removed CRR BPM changes (Transfer revenue allocations for released transmission will be described in Settlements BPM, per EDAM framework impact) - EDAM BPM scope will include EDAM Access Charges (framework will address both EDAM TSPs and PTOs) - Market Operations BPM will include CISO BAA assessment and input of Stressed Hour indicators + Reason Code - Settlements & Billing BPM will include EDAM Access Charges (attestation forms, CISO BAA settlement configurations)
3.2	<p>EDAM Access Charge Tariff Provisions:</p> <ul style="list-style-type: none"> - Addition of Section 26.2 (CISO BAA EDAM Recoverable Revenue and EDAM Access Charges) - Addition of Section 33.26 (Historical Revenue Recovery and Charges) - For informational cross-reference with EDAM framework tariff sections, the following sections were added: <ul style="list-style-type: none"> - Section 33.11 (Settlement & Billing for EDAM Market Participants) - Section 33.18 (Tariff Transmission Service by EDAM Transmission Service Providers) - Section 33.31 (Extended Day-Ahead Market Requirements)
3.3	<p>Other:</p> <ul style="list-style-type: none"> - Market Simulation scenarios expanded to include settlement for EDAM Access Charges (both for Gross Load SCs as well as PTOs/EDAM TSPs); - SPTO references were removed for simplification (will be addressed in the SPTO initiative) - External Onboarding impacts clarified that CISO BAA-adjacent EDAM BAAs onboarding may require new attestation - External Training minor updates for active EDAM recoverable revenue
4	Minor edits to BRQs (tariff provision mapping updates, added cross-references to framework's EDAM Implementation BRS)
4.1.1	<p>BRQ-003: EEA Watch criteria will not apply to Level 1, 2, or 3 (reference removed).</p> <p>BRQ-003C: clarified reason code field provides singular value representing the most prominent criteria causing stressed hour</p>
4.2.1	Added BRQ-012A: Clarified that EDAM transfers are financially settled at both the EDAM export or import location as well as at the associated load (with differences between the two accounted for in the imbalance energy offset and transfer revenue calculations). Similar updates made to BRQ-012E, -012G.
4.2.2	BRQ-0124A, -124B, -124C, and -125: Notes that all the product types for Transfer Revenue will be included within a single charge code (TBD). See Tariff Section 11.2.4 provisions as reference.

External BRS v1.3: EDAM Access Charges for ISO BAA Tariff Filing Scope

Section	Summary of Additions/Changes
4.4	Addition of EDAM Access Charges and Recoverable Revenue Requirements for the CISO BAA, per Tariff Filing ER25-437.
4.4.1	<p><i>Historical EDAM Recoverable Revenue Requirement Component Calculation:</i></p> <p>BRQ-160 (process overview): <i>Detailed breakdown provided in BRQs -161, -162, -163, -164, -165</i></p> <ul style="list-style-type: none"> - CISO BAA intertie locations will assess historical forgone revenue based on their historical average WAC revenue at that location with a ratio multiplier applied of its exports with sinks to EDAM BAAs relative to all its exports. - Each impacted location's EDAM recoverable revenue is proportionally distributed to PTO(s) on the proportion of their associated transmission rights relative to all transmission rights at location. - Each PTO accumulates all its impacted locations to a single historical recoverable revenue requirement ("component 1"). - CISO BAA's historical EDAM revenue requirement is the aggregate sum of all PTO component 1 requirements. <p>BRQ-166: A cap limit applies to all PTO component 1 recoverable amounts such that they do not exceed their projected Component 1 EDAM revenue requirement.</p> <p>BRQ-167: Component 1 EDAM requirement remains a fixed annual amount in perpetuity until the EDAM footprint definition is changed in a manner that impacts the CISO BAA</p>
4.4.2	<p><i>New Transmission EDAM Recoverable Revenue Requirement Component Calculation:</i></p> <p>BRQ-180: Two types of New Transmission ("Component 2") recoverable revenue calculations: 1) expiration of existing contracts, 2) transmission network upgrades ("Upgrades"); <i>PTO initiates submission of this information to both FERC as a filing and, once approved, to the CISO BAA through attestation.</i></p> <p>BRQ-182: Calculation of expired Existing Contract's EDAM recoverable revenue (if expiring after EDAM Day 1) = contract revenue amount at expiration with multiplier reflecting percentage of total PTO Component 1 recoverable revenue applied to PTO's total TRR.</p> <p>BRQ-183: Calculation of Proxy Baseline Ratio (only applies to BRQ-184). Only applied if Upgrade's intertie location did not exist prior to EDAM Day 1.</p> <p>BRQ-184: Calculation of Upgrade's recoverable revenue (if activated after EDAM Day 1) reflects TRR associated with Upgrade with an applied multiplier of the proxy baseline ratio (or ratio at intertie location, if it existed prior to EDAM Day 1)</p> <p>BRQ-185: Component 2 recoverable revenue requirements are accumulative for each PTO's Existing Contract and Upgrade amounts, and these amounts are considered fixed in perpetuity until new Existing Contract expirations or Upgrades occur that impact the CISO BAA. Component 2 calculations apply in the following year's revenue recovery settlements, with a true-up to handle any interim period.</p>
4.4.3	<p><i>Excess Wheel-Through Recoverable Revenue Requirement Component Calculation:</i></p> <p>BRQ-190: Calculation of hourly excess wheel-through transfer volume; excludes transfers with ETC/TOR (value rolled-up to monthly amount).</p> <p>BRQ-192: Calculation of monthly Excess Wheel-Through Transfer recoverable revenue amount ("Component 3") on CISO BAA basis.</p> <p>BRQ-193: Calculation of PTO share of Component 3 recoverable revenue requirement.</p> <p>BRQ-194: Monthly Component 3 actuals will be provided in bill determinant file</p> <p>BRQ-195: Attestation of Component 3 amounts; actuals apply to following year's projected Component 3 recoverable amount</p>

External BRS v1.3: EDAM Access Charges for ISO BAA Tariff Filing Scope

Section	Summary of Additions/Changes
4.4.4	<p><i>True-Up of Recoverable Revenue Requirement:</i></p> <p>BRQ-200: Calculation of EDAM recoverable revenue shortfall or surplus; application of amount as credit or debit for following year.</p> <p>BRQ-201: Monthly true-up actuals will be provided in bill determinant file.</p> <p>BRQ-202: Monthly true-up actuals apply to following year's projected true-up recoverable amount</p>
4.4.5	<p><i>Participating Transmission Owner Submission of EDAM Recoverable Revenue Requirement Affidavit (Attestation):</i></p> <p>BRQ-216: Each PTO performs attestation of projected annual EDAM recoverable revenue requirements (Components 1-3), true-up, and the prior year's actual gross load; submission form will be separate from the TAC submission form (Schedule F)</p> <p>BRQ-217: PTO requests review with CISO BAA through their client representative, if needed.</p> <p>BRQ-218B: EDAM Access Charge affidavit information provided through attestation is published on CAISO.com website.</p> <p>BRQ-219: EDAM Access Charge rate calculation process (performed by CAISO); each EDAM BAA transfer pair will have its own rate (BAA with revenue recovery requirement, BAA with revenue recovery distribution on basis of gross load)</p> <p>BRQ-221: EDAM Access Charge rates are published for each EDAM BAA pair (each EDAM BAA will have a specific EDAM Access Charge rate associated with the CISO BAA)</p>
4.4.6	<p><i>EDAM Access Charge Assessment and Settlement:</i></p> <p>BRQ-257: (Part of the EDAM framework) Distribution of collected EDAM recoverable revenue to PTOs (see EDAM Implementation BRS for collection of charges from gross load)</p> <p>BRQ-265: Monthly EDAM access charge bill determinant information will be published in the bill determinant file</p> <p>BRQ-270: Intended timeline for EDAM Access Charge recoverable revenue requirement attestation expected for October with January 1 activation; prospective changes may apply under certain conditions</p>
4.5	<p>Market Simulation Scenarios:</p> <p>MSIM-303, 303F: Cross-references to EDAM Implementation BRS provided</p> <p>MSIM-304A: EDAM Access Charge rates and recoverable revenue requirement information is provided to participants.</p> <p>MSIM-304B: DA market receives necessary inputs for EDAM market run</p> <p>MSIM-304C: EDAM access charge allocations to gross load, EDAM access revenue distribution to PTOs/TSPs</p>

Independent 2025 Releases

2025 – FERC 2023 Generator Interconnection Life Cycle

Project Information	Details/Date
High Level Business Problem or Need	Effective with Cluster 15, the resource interconnection process will transition to maintain compliance with FERC Order 2023 using a new platform GRIP. This mandate will streamline the intake of generator interconnection requests, study processes, contracting and management of the queue.
High Level Project Scope	<p>Align the following Cluster 15 resource Interconnection processes to meet compliance of FERC Order 2023 tariff provisions:</p> <ul style="list-style-type: none"> - Transition from GIDAP to new Resource Interconnection Standard (RIS) procedures - Initiate Cluster Request Window for Interconnection Request (IR) submission, Customer Engagement Window, Cluster Study process including scoping and results meeting, Reassessment process, Contracting and Queue Management - Increase transparency of information to customers and public <p>Cluster 14 and prior will initially remain in RIMS but will migrate to GRIP next year</p>
Releases	<p>Release 1 was to open the Cluster Request Window for IR submission on October 1 and close it on December 1 (Completed on 10/01/24).</p> <p>Release 1.5 for GRIP (Grid Resource Interconnection Portal) application included additional items (Completed on 11/14/24).</p> <p>Release 2 was primarily focused on meeting requirements necessary to support the Customer Engagement Window that begins on January 1, 2025 (completed on 12/20/24).</p> <p>Release 2.1 planned for 01/23/2025 is primarily focused on meeting requirements necessary to validate applications in the Customer Engagement Window.</p> <p>Further releases will add the Engagement Window, in Q1 2025, Cluster Study Process module and Generation Interconnection Agreement module in Q3 2025 and Infrastructure Coordination module in Q4, 2025. The existing RIMS Application & Study data will be migrated to the GRIP platform in late 2025.</p>

2025 – Highest Emergency Rating

Project Information		Details/Date	
High Level Business Problem or Need		The project aims to primarily improve market robustness, performance, and the technology foundation for system grid reliability by updating functionality and interfaces to reduce workarounds, automating manual processes and addressing minor defects or functionality enhancements identified in by the business units.	
High Level Project Scope		<p>This enhancement focuses specifically on internal ISO users and RC Customers having the capability to adjust the HER and ER duration in OMS.</p> <p>Step 1 – HER data cleanup</p> <ul style="list-style-type: none"> • Load HER in EMMS in one of the existing slots • Transfer HER to RTCA during the network model build process <p>Step 2 – Use RTCA to update HER</p> <ul style="list-style-type: none"> • For interim changes to HER in between models, change the data directly in RTCA • Make the ER and HER duration and value fields editable • Include validation to make sure HER is not less than the emergency rating <p>Step 3 – WebOMS changes</p> <ul style="list-style-type: none"> • Work with OATI to include a new field for HER • HER can be updated in WebOMS in between model promotions • Updates to HER will be sent to downstream systems

2025 – Hybrid Resources 2C RIMS

Project Information	Details/Date
High Level Business Problem or Need	<p>The ISO launched this stakeholder initiative to identify new or enhanced market rules and business processes needed to accommodate hybrid resources, resources that consist of two sets of market rule changes that will facilitate mixed-fuel type (hybrid and co-located resources) project participation in the ISO markets.</p> <p>Prior to this initiative, Phase 1 identified a first set of modifications generally concerned with setting up and operating co-located resources.</p> <p>Building on phase 1, Phase 2 focuses on modifications that will explore how hybrid generation resources can be registered and configured to operate within the ISO market. The initiative will further develop solutions allowing developers to maximize the benefits of their resource's configuration. Additionally, hybrid resource configurations also raise new operational and forecasting challenges that the ISO plans to address during this initiative.</p>
High Level Project Scope	<p>With this initiative, there's an opportunity to increase storage and the number of hybrid resources that can connect to the ISO grid. Currently the interconnection queue includes more than 24,000 MW of mixed fuel projects and nearly 20,000 MW of storage which represents roughly half of all generation in the current interconnection queue.</p>
BPM Changes	Settlements & Billing

2025 - Congestion Revenue Rights (CRR) Upgrade

Project Information	Details/Date
High Level Project Scope	<p>The Congestion Revenue Rights (CRR) system was implemented by CAISO in 2008 as part of the Market Redesign and Technology Upgrade (MRTU) implementation. The current CRR system is at its end of life, does not have the flexibility to accommodate future policy changes and requires the ISO to calculate data and run processes manually outside the current system to produce a successful CRR Auction.</p> <p>The CAISO has decided on a significant upgrade of the existing CRR system and adopt the latest technology stack aligned with CAISO's technology standards, consolidate all CRR related functions, minimize human errors, reduce processing time, eliminate manual workarounds, and positions the system to accommodate policy changes down the road.</p> <p>Congestion Revenue Rights (CRR) system replacement project scope is the roll-out of a:</p> <ul style="list-style-type: none"> • Brand new user-interface (UI) system with an updated new look -and-feel, to replace the existing legacy system implemented during the MRTU 2008 go-live and brought up to current ISO technology standards • Set of application-programming interfaces (APIs) to enable integration between ISO and market participant systems <p>Overall, to support the following in one consolidated CRR external-facing system:</p> <ul style="list-style-type: none"> • Annual/Monthly Auction and Allocation market participant bid submission and results retrieval • Load data submission by CRR LSEs, CEC • Load migration data submission by CRR UDCs • Secured "Congestion Revenue Rights Full Network Model" information access • Private and public access of CRR market input and output information
BPM Changes	<p>Congestion Revenue Rights</p> <ul style="list-style-type: none"> • Enhancements made to the new CRR product. • Automatic publishing of CRR market results. • Automatic CRR notification. • New CRR schedule calendar. • New CRR FNM access. • New CRR data submission and download interface UI/API. • New CRR market results interface. • Load Migration
Tariff Change	No
Impacted Systems	CRR, AIM, CMRI, OASIS, CTS, Market Clearing, EMMS, IFM/RTN, MQS, Master File, MPP, Settlements, WebOMS, ETCC.

2025 - Congestion Revenue Rights (CRR) Upgrade

System	High Level Changes
CRR	Significant system upgrade including: <ul style="list-style-type: none">• Enhancements made to the new CRR application.• Automatic publishing of CRR market results.• Automatic CRR notification.• New CRR schedule calendar.• New CRR FNM access.• New CRR data submission and download interface UI/API.• Other TBDs identified through BRS development.
AIM	<ul style="list-style-type: none">• New users and roles to support new CRR functionality
OASIS	<ul style="list-style-type: none">• Publish CRR Calendar, and all available CRR market names, and credit margin information, 3 year historical expected value..• Allow authorized users to publish CRR inventory payloads• Broadcast the following: set aside values, the results of all CRR markets, retired node/anode mapping, binding constraints, initial and updated CRR source and sink list for each CRR market,
CTS	<ul style="list-style-type: none">• Broadcast
EMMS	<ul style="list-style-type: none">• CRR will consume data from EMMS

2025 – Transmission Exchange Agreement

Project Information	Details/Date
High Level Business Problem or Need	<p>The ISO is committed to develop a process or system that allows Western Area Power Administration – Sierra Nevada Region (“WAPA”) to resell some or all of their 400 MW ownership rights on the PAC#1 line to other SCIDs and retain the perfect hedge and scheduling priority to further contract negotiations to extend the term of the Transmission Exchange Agreement.</p> <p>The Transmission Exchange Agreement (“TEA”) with WAPA-SNR, PG&E and ISO is scheduled to expire 9/30/2024. A term of the original agreement executed in 2004, was that the ISO would develop a system that allowed WAPA to sell their unused capacity on their line. This project provides solution to the scheduling issue which needs to be in place by June 2024 to ensure that the ISO has solved the problem and support filing an amendment and extension of the TEA at FERC.</p>
High Level Project Scope	<ul style="list-style-type: none"> WAPA needs functionality to sell their TOR to other parties on their OASIS. If the TOR rights are sold then WAPA will notify the CAISO to provide the purchaser the hedging and scheduling priority opportunity provided all ETCs/TORs. The market and settlement systems need to be able to “move” the Contract Reference Number (“CRN”) from the WAPA CRN to the purchaser SCIDs so that the settlement to the purchaser SCID reverses the costs of the transmission access charge and congestion (aka the perfect hedge) and provides a high scheduling priority in the IFM and RTM. WAPA will not take on the obligation to settle with their purchaser. WAPA can sell any increments of MWs up to their 400 MW ownership rights. Therefore, the solution needs to be flexible enough to allow the “existing” TORs to vary the MWs capabilities. [Note: The MW increments to be sold can be no less than 5 MW.] WAPA’s functionality allows them to schedule between Malin and Round Mountain, Malin and PG&E DLAP, and Malin and Tracy. This would be the source and sink that that functionality needs to provide. If there are outages on the line, the curtailment should be consistent with current practice.

2025 – FERC 881 – Managing Transmission Line Ratings

Project Information	Details/Date		
High Level Project Scope	This initiative will address the California ISO's compliance with FERC Order No. 881 in establishing new transmission line rating requirements		
	<p>Order No. 881 establishes new transmission line rating requirements for public utility transmission providers</p> <ul style="list-style-type: none"> Establish and use ambient-adjusted ratings and seasonal ratings for all transmission lines unless excepted <ul style="list-style-type: none"> Use AARs for near-term transmission service requests Use seasonal rating for long-term transmission service requests RTOs/ISOs must implement systems and procedures to allow transmission owners to electronically update transmission line ratings at least hourly Use uniquely determined emergency ratings for contingency analysis in the operations horizon and in post-contingency simulations of constraints Implement transparency reform

BRS	Publish BRS – Track 1 (Updates & Added FAC-011)	Jun 11, 2024	✓
	Publish BRS – Track 2	Nov 22, 2024	✓
	Publish BRS – Track 2 (Updates)	Mid-Feb 2025	
Market Simulation	Market Simulation webLineR	Jan – Jun 2025	
Production	Track 1 Real-Time Reliability Applications	Apr 1, 2024/Dec 10, 2024	✓
	Track 2 Operational/EMS Model Data & Applications	Jun 2025	
	Track 3 Market Application and Look Ahead Applications	Jan – Jul 2026 Phased Implementation	

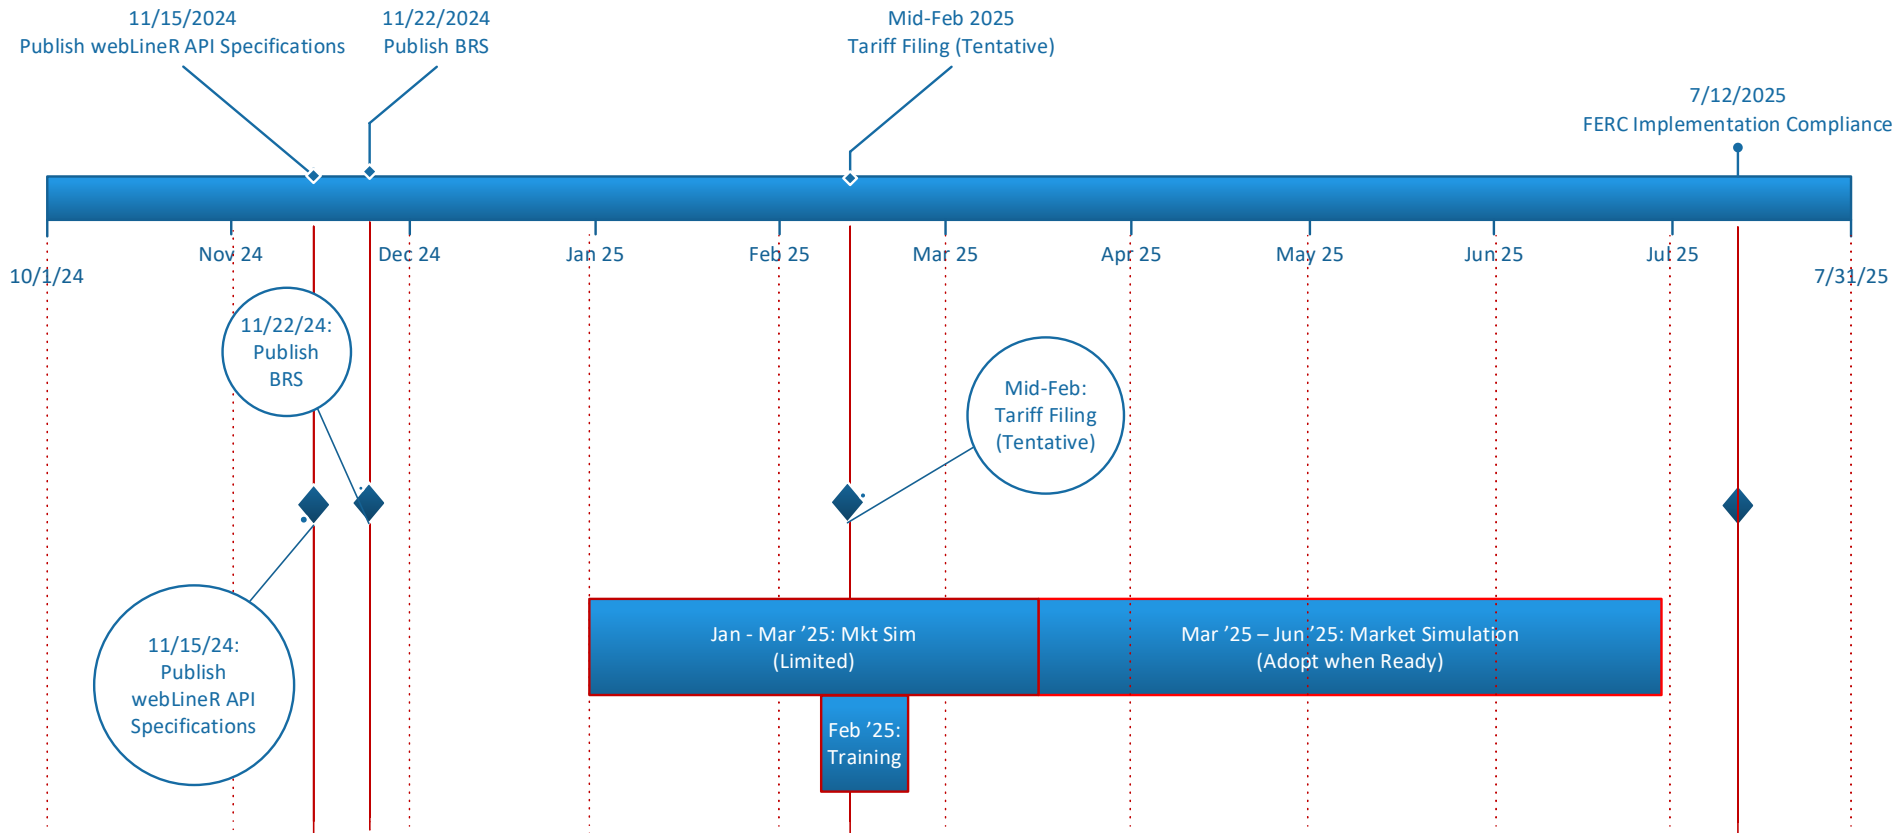

CAISO/RCWEST FERC 881 Implementation:

- Track 1 and Track 2 are in flight to be completed by June 2025.
 - **Track 1 – Real Time Reliability Applications**
 - Target Capability to be ready by end of December 2024.
 - Final changes will remain inactive until webLineR is ready for production
 - **Track 2 – Operational/EMS Model Data and Applications**
 - webLineR product will be utilized for receiving Look ahead ratings.
 - Target Capability to be ready June 2025
 - External user training targeting Mid-Feb
 - Phased Market Simulation planned for Jan –Jun 2025
 - Jan 2025: Limited Market Simulation will consist of:
 - » Connectivity
 - » User Access / Provisioning
 - » User Interface (UI)
 - » Manual data upload
 - » B2B API mock service available
 - Mid-Feb 2025: Full Market Simulation
 - » B2B API submissions and validation
 - » Unstructured Scenarios
 - **Track 3 – Market Application and Look Ahead Applications**
 - Proposing a delayed phased in implementation.
 - Stakeholder discussion over changes held on 12/16.
 - Comment period open. We would like to hear feedback from stakeholders.
 - CAISO/RCWEST plans to go to FERC and seek an extension in Mid-January 2025.

webLineR Milestone Timeline

FERC 881 webLineR

1/20/2025

CAISO RCWEST Compliance Phased In Implementation

December 2024

CAISO/RCWEST EMS/EMNA/HANA applications can receive real time AAR ratings through ICCP. Only reliability apps and no markets usage. TOP can send AAR ratings

June 2025

New webLineR tool will be ready to receive 240 hrs of AAR.

TR and webLineR will be ready to receive 4 seasonal ratings

TOP can send Seasonal and AAR ratings .

Monitor and evaluate ratings

January 2026

FERC 881 code changes for real time markets into production.

Enable usage of AAR in EIM market for WEIM entities.

Entities can choose to enable usage of AAR in real time markets

April 2026

FERC 881 code changes for Day ahead markets into production.

Entities that participate in both markets can choose to enable usage of AAR.

Enable Usage of AAR in DACA/LACA / LTCA and IOOC. Look ahead reliability applications.

July 2026

Complete remaining compliance work. Nomograms and usage of AAR in RAS.

Usage of AAR in ETCC/Webwheel and TTC calculations and post hourly ATC. Seasonal COI and other Path Limits calculations.

CAISO RCWEST Phased In Implementation

- FERC 881 code for real time and day ahead markets will be included in EDAM code delivery and market simulation activities.
- Enable usage of AAR in real time markets for WEIM entities in January 2026.
- Enable usage of AAR in day ahead markets in April 2026.
- Enable usage of AAR in look ahead reliability applications in April 2026.
- Enable usage of AAR in ETCC/Web wheel for hourly TTC calculations by July 2026.

2025 - Enable Non-Generating Resources to Participate in Inter-SC

Information	Details
Source	2024 Annual Policy Initiatives Roadmap Process
Category	Storage
Submission	Enable non-generating resources to participate in inter-SC trade
Summary	Allow non-generating resources to participate in inter-SC trade and offer physical energy product in order to continue effective integration of higher capacities of energy storage and meet RA and GHG compliance goals.
Description	In the current market design, standalone battery storage projects are not available to be selected in the "location" dropdown list for transactive physicals in IST. To continue effective integration of higher capacities of energy storage and meet RA and GHG compliance goals, the ISO should allow NGRs to participate in inter-SC trade and offer physical energy product. Enabling battery storage to participate in physical IST would increase market efficiency and reduce uncertainty in the preschedule window, and would allow battery storage to offer supplemental capacity or replacement energy through IST.
Presentation	May 15, 2024
System Impacts	Scheduling Infrastructure & Business Rules (SIBR)

Milestone Type	Milestone Name	Dates	Status

**This effort is separate from the "Inter-SC Trades in Regional Markets" policy initiative*

2025 – WEIM Fab Enhancements

Business Opportunity/Problem Statement:

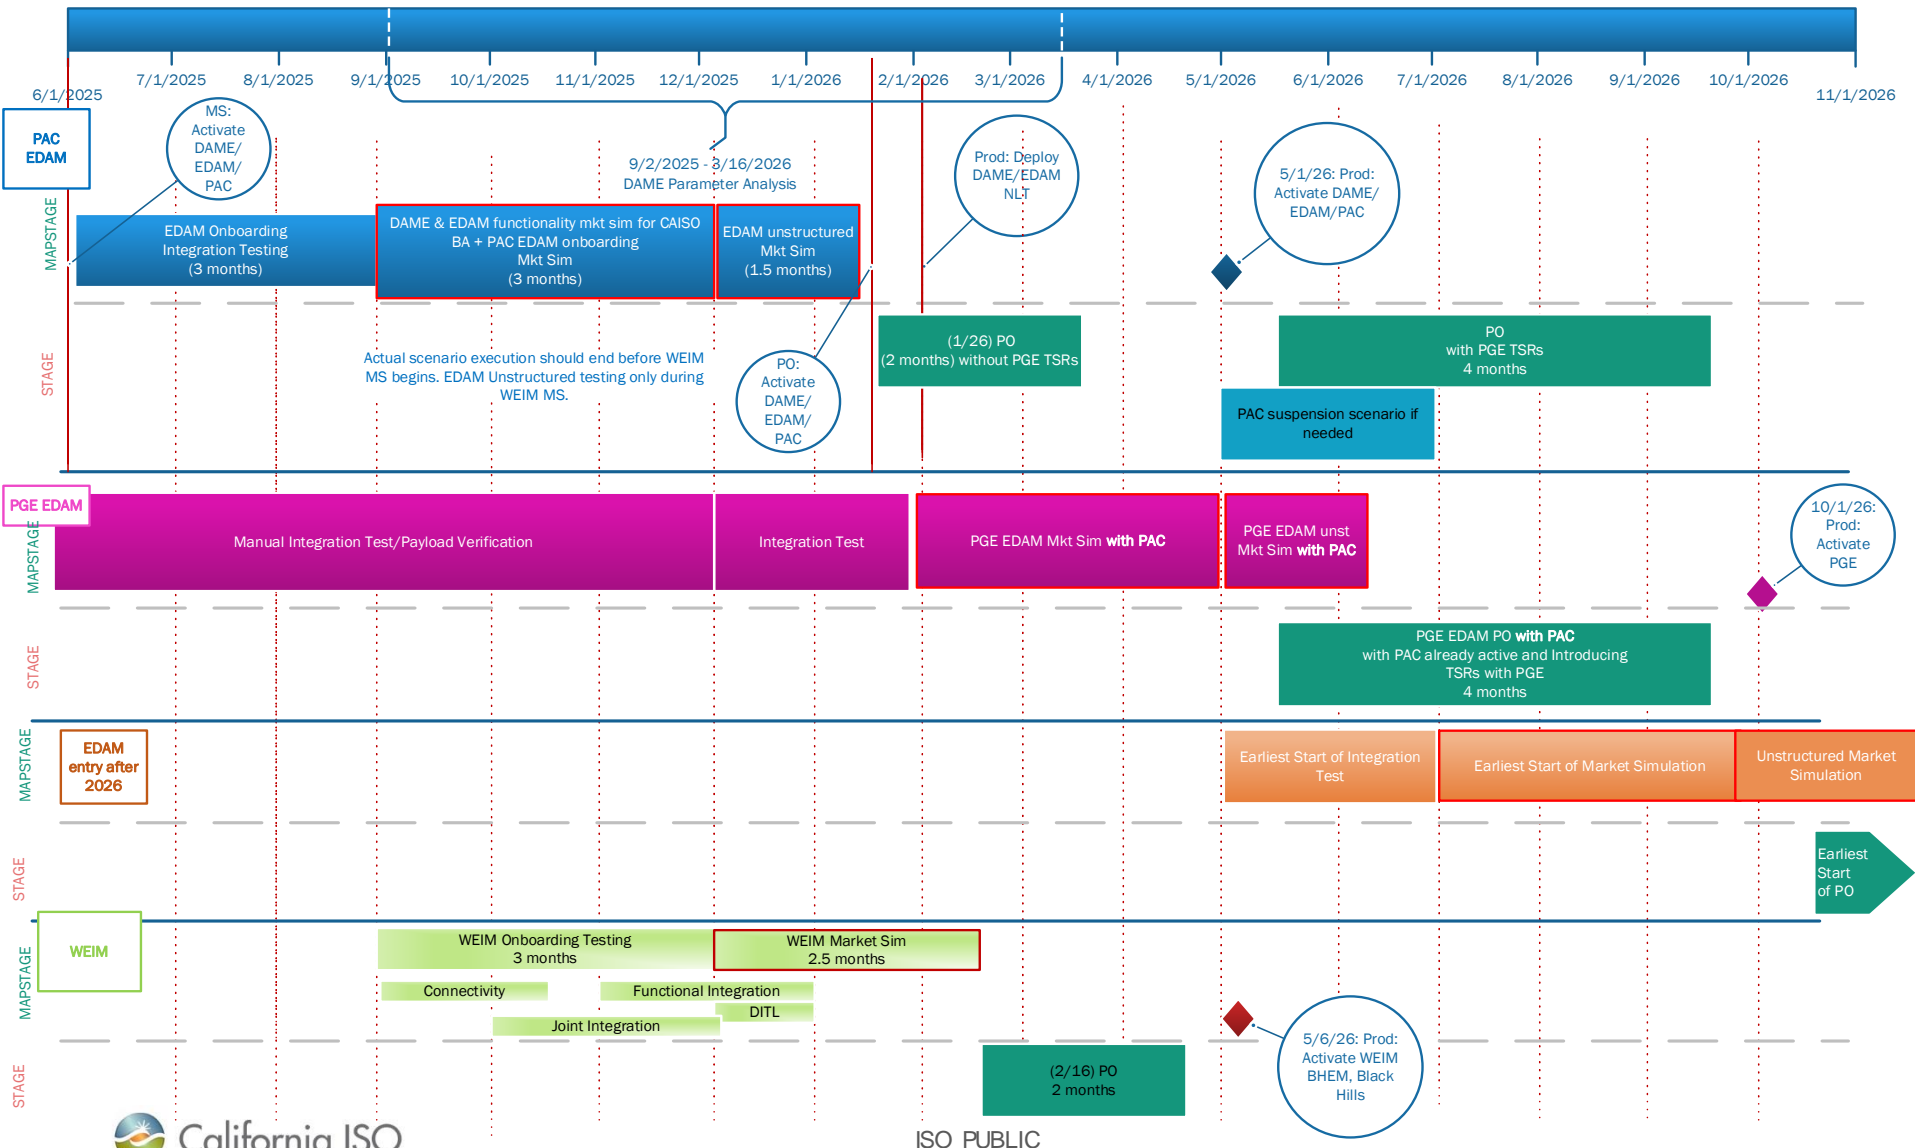

What:	<p>WEIM FAB Enhancements consist of three enhancements and one improvement. This project aims to improve RTM robustness, minimize Market Isolations, modernize tools for Support Control Center, provide accurate, accessible, and clear information to ensure customer preparedness and to deepen understanding about the reliability needs of the grid.”</p> <p>WEIM Fab-Enhancements:</p> <ul style="list-style-type: none">✓ 1) Congestion Management Full Transparency – Implemented June 20242) Hourly Base ETSR Schedule Redundancy (project, RTM payload). Note: This item is being pursued as its own stand alone project.✓ 3) External WEIM Commitment Override (BAAOP UI) – Implemented December 20244) Dynamic ETSR Limits – Safety Net✓ 5) System Net ITC Definitions – Implemented November 2024
Who does this opportunity/problem impact:	WEIM entities, WEIM BA Operators (CAISO included), RTMO
BRS	<p>Version 1.1 available for “Dynamic ETSR Limits – Safety Net” and BRS 1.1 comments period was open thru 01/16/25:</p> <p>Modify BRQ 040, add BRQs 041 & 042</p>

2025 – WEIM Fab Enhancements: Dynamic ETSR Limits Safety Net

Project Information	Details
High Level Business Problem or Need	<ul style="list-style-type: none">The Dynamic ETSR Limits Safety Net seeks to resolve a known reliability issue for numerous WEIMs.This enhancement is currently slated for 2025. Timeline updates to be provided in future meetings.
High Level Project Scope	<ul style="list-style-type: none">This enhancement seeks to define and introduce a safety net in the event the Dynamic Limits Interface (DLI) has an issue with send/receive payload or null values in RTM.CAISO is actively scoping this enhancement to ensure WEIM alignment prior to proposing an agreed upon solution. This item shall be more thoroughly disclosed in future WEIM meetings.
BPM Changes	TBD

May 1, 2026: DAME & EDAM Production Activation		

Rev. 11/19/2024

Spring 2026 – Day Ahead Market Enhancements

Project Information	Details/Date
High Level Business Problem or Need	<p>In recent years, Variable Energy Resource (VER) have gained significant traction in the energy grid, playing a crucial role in achieving renewable energy targets and reducing greenhouse gas emissions. However, their increasing presence has introduced a new challenge energy imbalances between the Day Ahead and Real Time markets.</p> <p>Another reason for the energy imbalance is the day-ahead market operates on hourly time increments, whereas real-time market schedules energy in 15 and 5-minute intervals. This discrepancy in granularity results imbalances since the rea-l-time market schedules fluctuate within the hour while day-ahead market schedules remain fixed for the entire hour.</p> <p>These imbalances necessitates out-of-market interventions by operators, such as forecast biasing and dispatches, to uphold grid reliability. However, this situation presents an opportunity to improve our market software, enabling us to achieve a more efficient and economical solution while addressing the variability and reliability concerns within the market.</p>
High Level Project Scope	<p>Enhance the California ISO's (CAISO's) day-ahead market by:</p> <ul style="list-style-type: none"> • Introducing an imbalance reserve (IRU/IRD) product to provide flexible capacity to account for real-time ramping needs • Enhancing the residual unit commitment process to also ensure there is sufficient downward dispatch capability (RCU/RCD) • Enhancing the day-ahead market to maximize benefits of greater West-wide diversity in the day-ahead optimization for Western Energy Imbalance Market participants

DAME Configurable Parameters Working Group: Timeline

- The CAISO is accommodating requests to extend the timeline of the working group effort and adjusting the timeline to facilitate additional working group sessions
 - ◆ additional working group sessions
 - Start session earlier than originally proposed
 - Kick-off session in August 2025
 - Monthly working sessions starting in October

Proposed time schedule for WGCP based on part of the overall DAME/EDAM schedule

- Overall schedule includes formal stages of
 - Market Simulation
 - Parallel Operations
- Analysis of configurable parameters can start only after market application is functional and readily available
- Although effort for WGCP will happen concurrent to Market Simulation and Parallel Operations, it is an independent effort
- The WGCP will leverage on Market Simulation and Parallel Operations efforts to perform analysis on the parameters

Although the WGCP effort will happen concurrent to Market Simulation and Parallel Operations, it is a separate effort

Day Ahead Market Enhancements BRS Revisions 1/2

BRS v1.4 published 12/23/24

Section	Overview of Changes	Reason for Update	Updated	New	Removed
3.1, 5.4, 5.5, 5.8, 5.9, 5.10, 6.1	1. Clarified, corrected typos and cleaned up the document.	Clean Up ISO/Market Participants Feedback	§3.1, BRQ-04060, BRQ-04070, BRQ-04080, BRQ-04132, BRQ-05002, BRQ-05160, BRQ-05170, BRQ-09540, BRQ-10160, BRQ-10160A, BRQ-10160B, BRQ-10740, BRQ-11420, §6.1		
5.1	2. Toggled MF RUC Participation Flag for LESRs to Yes.	ISO SME Feedback		BRQ-01135	
5.4	3. Deleted penalty price for IR.	ISO SME Feedback			BRQ-04130
5.4	4. Matched the formulation to limit the IRU/IRD surplus to IRU/IRD requirements on BAA level instead of surplus zone.	ISO SME Feedback	BRQ-04135		
5.4	5 Corrected verbiage about LDF to use SYS LFZ (renormalized with respect to current topology).	ISO SME Feedback	BRQ-04200		
5.4, 5.5, 5.6, 5.9, 5.10	6. Accounted for import/export direction for IRU/IRD, RCU/RCD and FRU/FRD nodal and resource-specific SP-Tie prices and published them in OASIS/CMR/FERC.	ISO SME Feedback	BRQ-04390, BRQ-04400, BRQ-05180, BRQ-05182, BRQ-10160A, BRQ-11420	BRQ-04395, BRQ-04405, BRQ-05181, BRQ-05183, BRQ-06100, BRQ-06120, BRQ-10160AA	
5.4, 5.5, 5.6	7. Revised shadow prices adjustments for the calculations of nodal and resource-specific SP-Tie IRU/IRD, RCU/RCD and FRU/FRD marginal prices.	ISO SME Feedback	BRQ-04390, BRQ-04400, BRQ-05180, BRQ-05182	BRQ-04395, BRQ-04405, BRQ-05181, BRQ-05183, BRQ-06100, BRQ-06120	
5.5	8. Removed use of unmitigated bids for RUC 48 and 72 hours as RUC will only run for 24 hours ahead now.	ISO SME Feedback	BRQ-05030		
5.5	9. Clarified to replace REN with RCU/RCD in calculations of RCU/RCD marginal prices breakdowns.	ISO SME Feedback	BRQ-05160, BRQ-05170		
5.7	10. Updated details for the calculation of monthly RA Showing Capacity.	ISO SME Feedback	BRQ-07265		

Day Ahead Market Enhancements BRS Revisions 2/2

- BRS v1.4 published 12/23/24

Section	Overview of Changes	Reason for Update	Updated	New	Removed
5.9, 5.10	11. Clarified the price breakdown for nodal and resource-specific IRU/IRD marginal prices to be (total, capacity, congestion but no loss).	ISO SME Feedback	BRQ-10160, BRQ-10160A, BRQ-10160B, BRQ-10740, BRQ-11420		
5.9, 5.10	12. Clarified the price breakdown for nodal and resource-specific RCU/RCD marginal prices to be (total, capacity, congestion and loss).	ISO SME Feedback	BRQ-10160, BRQ-10160A, BRQ-10160B, BRQ-10740, BRQ-11420		
5.9	13. Updated to exclude publishing sub-components of MCC prices (by BAA) for nodal and resource-specific RCU/RCD marginal prices to OASIS/CMRI.	ISO SME Feedback	BRQ-10160, BRQ-10160A, BRQ-10160B, BRQ-10740		
5.10	14. Updated to include publishing sub-components of MCC prices (by BAA) for resource-specific IRU/IRD and RCU/RCD marginal prices to FERC.	ISO SME Feedback	BRQ-11420		

Spring 2026 – Extended Day Ahead Market (EDAM) Implementation

Project Information	Details/Date
High Level Business Problem or Need	The purpose of this initiative is to create a comprehensive extended day-ahead market that extends over multiple balancing authority areas (BAAs) participating in the Western Energy Imbalance Market (WEIM). EDAM is a voluntary day-ahead electricity market with the potential to deliver significant economic, environmental, and reliability benefits for participants across the West. EDAM will more efficiently and effectively integrate renewable resources and address the significant operational challenges presented by a rapidly changing resource mix, emerging technologies, and the impacts of climate change. EDAM will enable procurement of robust supply and flexible capacity that will position EDAM participants to effectively address changes in conditions from day-ahead to real-time, improving their response to potential reliability challenges. EDAM builds upon the proven ability of the WEIM to increase regional coordination, support state policy goals, and cost effectively meet demand.
High Level Project Scope	The EDAM design leverages existing features of the ISO day-ahead market that are common in other day-ahead markets across the country. The design also considers enhancements proposed in contemporaneous stakeholder initiatives that will harness flexibility across the larger footprint by incorporating an imbalance reserve product that will enhance price formation. EDAM introduces new products, imbalance reserve and reliability capacity, as well as new penalties, and a Resource Sufficiency Evaluation (RSE) surcharge.

Future Releases

Subscriber Participating Transmission Ownership Model

Project Information	Details/Date
High Level Business Problem or Need	<p>The Subscriber Participating Transmission Owner (Subscriber PTO) model is a new transmission development option available for transmission projects with generation development opportunities outside the CAISO balancing area to bring generation to meet California's policy initiatives. The model specifically supports CPUC generation portfolios required by the memorandum of understanding with the California State agencies and the CAISO. Accordingly, the Subscriber PTO model allows for additional transmission to be developed to connect the CAISO BAA with out-of-state generation that currently lack the necessary transmission to provide electricity to the CAISO BAA. The Subscriber PTO model thereby provides an option for projects not chosen in the transmission planning process to solicit Subscribers who then pay for the project (generation and transmission) and join the CAISO balancing area.</p> <p>The new Subscriber PTO Model enables a subscriber PTO to develop its project without recovering the costs for its project through a transmission revenue requirement. At the same time, those who have paid for the project, <i>i.e.</i>, the subscribers, are exempt from congestion and other related costs on the subscriber PTO line because the subscribers will receive similar treatment and priority to existing contract rights holders (ETCs). Additionally, the Subscriber PTO model provides a mechanism for subscribers that financed the project and associated network upgrades the ability to receive reimbursement for those costs from non-subscribers that use the Subscriber PTO transmission facilities.</p>
High Level Project Scope	<ul style="list-style-type: none"> • Develop Subscriber PTO Model: account for a new PTO model that does not increase the Transmission Revenue Requirement (TRR) of the Transmission Access Charge / Wheeling Access Charge (TAC/WAC)) and provides those who funded the project ("subscribers") with Existing Transmission Contract (ETC) designation to account for their rights on the CAISO controlled grid • Revise the TAC allocation process to fund the non-Subscriber usage payment amount ahead of allocation to the non-load serving PTOs • Charge non-subscribers for use of the Subscriber PTO line the applicable non-subscriber usage rate (\$/MWh) • Create a mechanism that allows for the payment to the Subscriber PTO for non-subscriber usage of the Subscriber PTO transmission facility: <ul style="list-style-type: none"> ○ Compare the Non-Subscriber Usage rate(s) (\$/MWh rate approved by FERC) to the TAC rate and pay the Subscriber PTO the lower of the two values ○ Create a flag to denote when the Non-Subscriber Usage Rate is higher than the TAC rate and publish results in the ISO bill determinant file <ul style="list-style-type: none"> ▪ Indicate monthly gross exports and imports for Non-Subscriber usage of the Subscriber PTO transmission line ○ Indicate the TAC rate and the Non-Subscriber Usage Rate(s) as part of the Settlements TAC reports • Develop methodology to address economic BAA to BAA transfers at new scheduling points created by Subscriber PTO transmission lines

Subscriber Participating Transmission Ownership Model

System	High Level Changes
BPM Changes	<ul style="list-style-type: none"> • Definitions and Acronyms • Generator Interconnection and Deliverability Allocation Procedures • Market Instruments • Market Operations • Reliability Requirements • Settlements & Billing • Transmission Planning Process
Tariff Changes	<ul style="list-style-type: none"> • Section 4: Roles and Responsibilities • Section 16: Existing Contracts • Section 24: Comprehensive Transmission Planning Process • Section 25: Interconnection of Generating Units and Facilities • Section 26: Transmission Rates and Charges • Appendix A: Master Definition Supplement • Appendix F: Rate Schedules • Appendix DD: Generator Interconnection Deliverability Allocation Procedures
Impacted Systems	
MF	<ul style="list-style-type: none"> • Develop Subscriber PTO model: including new participant type, new TAC area, new UDC, new WAC rules, and mapping
CIRA	<ul style="list-style-type: none"> • Identify resources subject to MIC and establish MIC at Sub PTO scheduling points/interties • Define RA obligation
SIBR	<ul style="list-style-type: none"> • Receive ETC designation and support bidding rules for subscriber generating resources (existing functionality)
ITS	<ul style="list-style-type: none"> • Consume new tie points and/or ITCs • Add Subscriber PTO loss resource IDs to loss table
IFM/RTM	<ul style="list-style-type: none"> • Calculate ASRS • Consume all hourly MSSC values
Settlements/ DReAMS	<ul style="list-style-type: none"> • Develop new bill determinants • Calculate financial loss return • Apply existing ETC rules • Update TAC/WAC revenue allocation process to include non-subscriber usage rate • Update configuration guides and bill determinants • Exclude Subscriber PTO UDC areas from UFE

California ISO

Settlement Upgrade Project

Jan 21, 2024

Settlement Upgrade Project – Overview

- The current settlement system, implemented in 2008 as part of the Market Redesign and Technology Upgrade (MRTU) implementation, is nearing its end of life. The CAISO is upgrading existing settlement applications to approved architectural and information security standards.
- Benefits for our customers include:
 - Improved business efficiency
 - Better gathering and analysis for data and front-end improvements for customers interacting with CAISO Settlement Systems
 - Increased transparency for some calculations
 - Accommodating data processing increases resulting from new market products and an increase in market participants
 - Ability to perform complex settlement calculations

Settlement Upgrade Project – Targeted Goals

- The ISO will work closely with our market participants to ensure seamless transition from e-terra 2.5 to 3.0 configuration output file.
- The ISO will leverage the Settlement User Group and Technical User Group for participants to ask more technical questions.
- The ISO will provide an environment with production-like data allowing customers to validate changes.
- The system will provide settlement outputs in various file formats, allowing all customers to access and use the data in day-to-day operations.
- The ISO will strive to make formulas and inputs transparent to enable market participants to monitor and/or validate settlement results.
- The ISO will provide market participants with an extended market simulation and timely support to the market participants and their vendors during the testing phase.

Settlement Upgrade Project – Targeted Goals (continued)

- From a vendor perspective:
- ISO will provide third party vendors with support during the transition period.
- ISO will provide an extended market simulation and/or parallel statements and invoices during the transition period so vendors can resolve defects on their systems.
- ISO will provide open communications to resolve settlement differences through a customer forum.

Settlement Upgrade Project – Status

- The ISO continues reviewing the overall schedule for implementation.
- In order to allow customers to have the time to focus on the Settlement Upgrade Project, as well as EDAM and DAME, a new schedule will be developed.
- The implementation will be after EDAM and DAME implementation.
- ISO will provide quarterly updates for the implementation for now and will ultimately increase the frequency of updates and the depth of information provided accordingly as we proceed
- The updates will be provided in the Release User Group and Settlement User Group
- To help ensure alignment of our communications between these two (2) forums, this same update was provided in the next Settlement User Group call
- The next Settlement Upgrade Project update will be in January 2025
- For comments or questions, please submit CIDI cases

Stay Informed

Ways to participate in releases

- **Next Release User Group Forum is February 4, 2025**
- Visit the Release Planning page
 - <http://www.caiso.com/informed/Pages/ReleasePlanning/Default.aspx>
- Attend meetings
 - Release Users Group (RUG) bi-weekly meetings
 - Initiative status updates
 - System change updates on releases
 - Market Simulation calls
 - Visit the ISO calendar at www.caiso.com for meeting dates and times and add events to your calendar
 - Typically held on Mondays and Thursdays
 - Market Performance and Planning Forum
 - Quarterly review of market performance topics
 - High level discussion of release planning, implementation and new market enhancements
